

POSTER EVALUATION

POSTER TITLE/ NUMBER

ASSESSOR-ID

Indicate the study type : RESEARCH LITERATURE REVIEW
 CASE STUDY/ EXPERIENCE REPORT OTHER

Indicate the area: OSTOMY CARE WOUND CARE
 CONTINENCE CARE PROFESSIONAL DEVELOPMENT
 OTHER

Likert scale rating to be used for assessment of each section: Circling "1" would mean the poster characteristic in question was "poor" and "10" would indicate "excellent". Each section has different weights (in parenthesis), i.e. the section score must be multiplied by the weight. Total score is the sum of the partial scores.

SECTION 1 - OVERALL APPEARANCE (WEIGHT 1)

- Overall visual appeal – layout of text and figures, logical, spacing.
- Balance of text and graphics - Pleasing to look at, colour, text, graphs.
- Poster size and shape (conference requirements attached).
- Names listed including title and credentials, Institution and or affiliations.
- Contact details.
- Placement of identification, easy to find.
- Acknowledgements of support if applicable for example corporate.

1 2 3 4 5 6 7 8 9 10

SECTION 2 - TITLE (WEIGHT 1)

- Clearly and exactly describes the posters subject matter.
- Informative and accurate.
- Concise wording appropriate for a formal written presentation.

1 2 3 4 5 6 7 8 9 10

SECTION 3 - CONTENT (WEIGHT 4)

- Introduction succinctly summarises and provides overview of poster.
- Purpose of study / project clearly stated.
- Research objectives, method, analysis and results clearly stated and explained where applicable.
- Graphs, figures and tables reflect content comprehensively, enough text to explain the graphics.
- Structuring - good and clear, coherent and well divided into sections in order to convey the content of the study / project.
 - Indications for ET practice clearly stated.
 - Organization and flow appropriate to move through the poster with understanding.
 - Main points clearly stated and explained.
 - Conclusion / discussion relevant to purpose of poster.

1 2 3 4 5 6 7 8 9 10

SECTION 4 - ORIGINALITY (WEIGHT 2)

- New technique, practice, or idea.
- Creative approach to clinical or professional practice or education.

1 2 3 4 5 6 7 8 9 10

SECTION 5 - REFERENCES (WEIGHT 2)

- Updated and adequate references are used to support the Introduction and Discussion/ Conclusion sections relating them to the study results.
- Primary literature sources included and sources properly cited.
- A recognized referencing system is used properly and consistently.

1 2 3 4 5 6 7 8 9 10
